Basics: C, C++, Python, Java

PROJECTS

1. Service Management CRM Panel - Node Js

A CRM application developed for a hardware company which improved customer management and service tracking efficiency by 60% through automated notifications. Key Features:
- Role-Based Authentication and Permission.
- Customer and Admin Interfaces.

Link: https://kinniko.com/admin

2. QuickMark - NextJs, Python Flask, NodeJs

A smart attendance system with facial recognition. Key Features:
- Facial Recognition system with MTCNN.
- SocketIO connection for real time feedback.
- Administrator Panel to view Attendance.

Link: https://github.com/prajall/smart-attendance-system

3. FileFolio - React & Firebase

Built a file-sharing app using React and Firebase, with 350+ folios from active users.
Key Features:
- Easy File Sharing,
- Share Code and Images
- Access from anywhere
- Add passwords for security

Link: https://filefolio.netlify.app/welcome

4. Kit-Store - NextJs + NodeJs

A full stack E Commerce application of a fashion brand. Key features
- Google O-auth.
- Content Management System
- Interactive dashboard.
